Gerald Huber

born in Austria 1969
inspired in Dubai since 2005

autodidact in art
doctor in engineering

Nature continuously provides me with life energy which I translate into GHiii-art.

My art sculptures are stepping out in 3D out from the picture background.
The light thus creates exciting shadow effects.
Each art work is alive and undergoes endless transformation.

Explore the hidden details of shadows and reflections.

There are plenty of natural inspiration impulses around us. However we often overlook as they are blended into our daily routines.
Explore, discover and enjoy the little wonders of nature and the inspiring energy from the little details.

heartbeats of Dubai

heartbeats of Jumeirah

heartbeats of Jumeirah

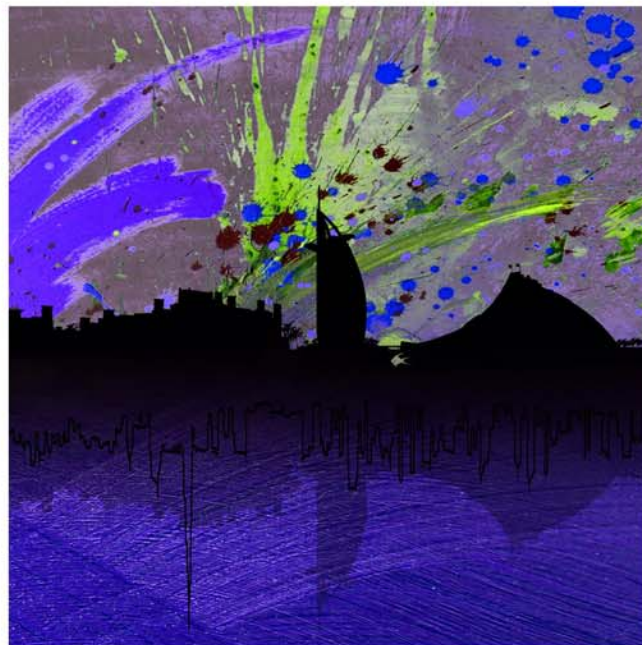

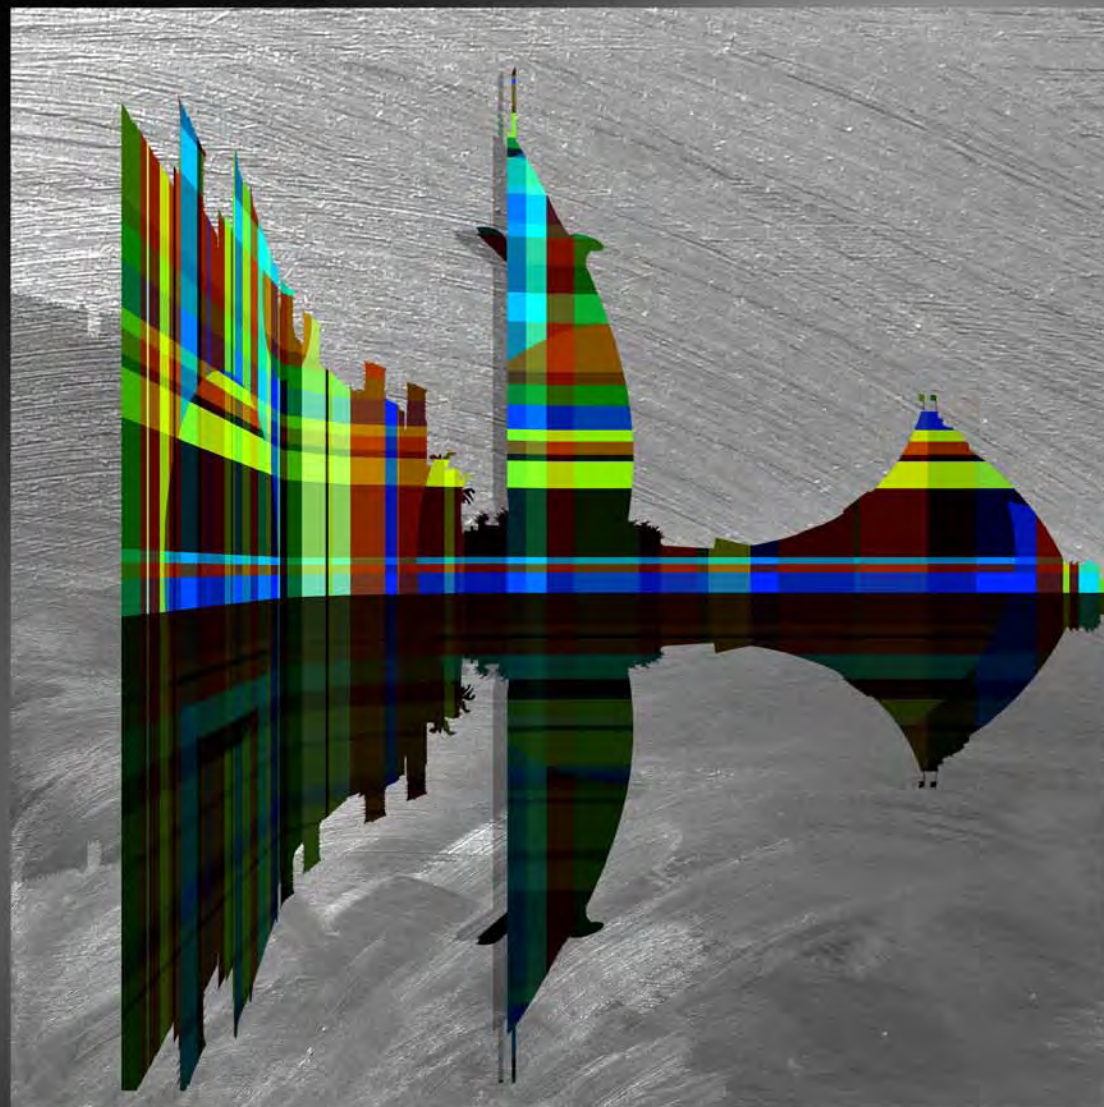

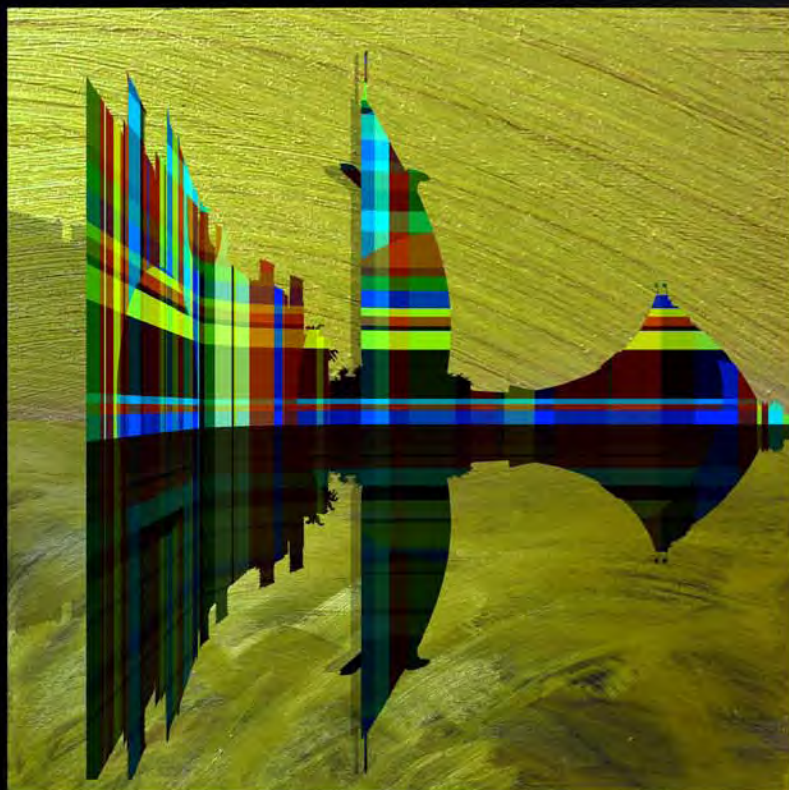

Jumeirah's Burj Al Arab laid the way
for all other project developments in Dubai.

In this art series the skyline of the
Sheikh Zayed Road interacts and transforms
out from the heartbeat of Jumeirah.

Burj Al Arab

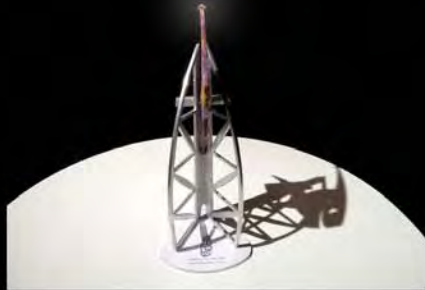

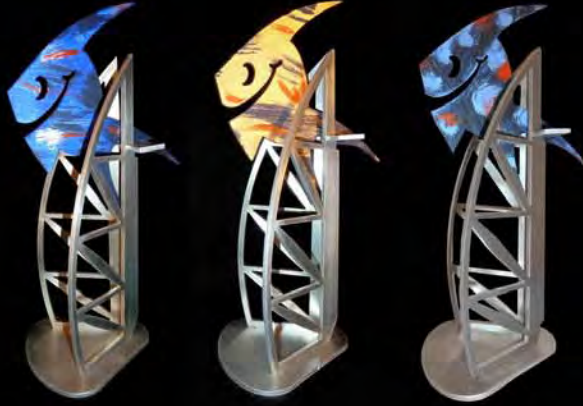

take the enerGHiii home

The Burj Al Arab is an icon for the power of inspiration – a dream which came true. With it's innovative shape the Burj al Arab dynamically raises out from the Arabian Gulf. Water is the basis of life and also laid the source for Dubai with its seafaring heritage. The two frames of the Burj Al Arab open up towards the main land of Dubai – creating space for a colourful Dhow sail full of positive energy.

Gerald Huber is an inspirARTion artist born in Austria and living in Dubai since 2005. With his GHiii Art projects he targets to spread positive enerGHiii. In this 'enerGHiii token' the GHiii fish – same as the colourful sail of the original tower - symbolises the inspirational energy and the dream's break through. Explore the token's shadow effects and allow the GHiii fish with the big smile to brighten up your days.

Burj Khalifa

take the enerGHiii home

The Burj Khalifa is an icon for the power of inspiration – a dream which came true. Gracefully and yet powerful the Burj Khalifa raises out from the vast of the Arabian Desert. Water is the basis of life and also laid the source for Dubai with its seafaring heritage. The Burj Khalifa bridges the gap between earth and the sky - full of positive energy it touches the water in the ground as well as in the clouds.

Gerald Huber is an inspirARTion artist born in Austria and living in Dubai since 2005. With his GHiii Art projects he targets to spread positive enerGHiii. In this 'enerGHiii token' the GHiii fish symbolises the inspirational energy and the dream's break through. Explore the token's shadow effects and allow the GHiii fish with the big smile to brighten up your days.
